### PROFESSIONAL SUMMARY

Full-stack developer pursuing a BSc. in CSIT (expected 2026), with hands-on experience building responsive web applications, secure REST APIs, and optimized relational and non-relational databases using the MERN stack. Has independently designed and shipped multiple end-to-end web platforms, from e-commerce to content streaming. Comfortable working across the full stack and integrating TypeScript for safer, more maintainable code. Actively contributes to open-source projects and is exploring practical applications of AI/ML in software development.

### TECHNICAL SKILLS

- **Frontend:** React, Redux, TypeScript, HTML5/CSS3, JavaScript (ES6+)
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL, SQL, Supabase
- **Tools & Other:** Git, RESTful APIs, JWT Authentication, C, C++

### EDUCATION

- **BSc. Computer Science (CSIT)** | Prithvi Narayan Campus | 2021 – 2026
- **High School (+2)** | Janta School | 2018 – 2021

### TRAINING & CERTIFICATIONS

- **MERN Stack Developer Certification** | Digital Pathshala | 2023
  - Completed an intensive full-stack training program covering React, Node.js, Express, and MongoDB; integrated TypeScript across projects to improve code maintainability and catch errors at compile time.
- **Web Development Certification** | ACS Pokhara

### KEY PROJECTS

- **E-Commerce Shoe Store** — Final Year Project
  - Built a full-featured shopping platform with advanced multi-attribute product filtering, persistent cart management, and a secure, multi-step checkout flow.
  - Tech: React, Redux, Node.js, Express, MongoDB, JWT
- **Stream Me** — [aurascreen.me](https://aurascreen.me)
  - Developed a content streaming platform with an Express-based backend, RESTful API design, and secure session handling for user authentication.
  - Tech: React, Node.js, Express, MongoDB
- **Seasonal Jersey Store** — [alexjersey.rocks](https://alexjersey.rocks)
  - Built a responsive e-commerce apparel storefront with dynamic, filterable product listings and a streamlined cart-to-checkout flow.
- **Cafe Website** — independent project
  - Built an interactive restaurant site with dynamic menu management and an online table reservation system.
- **Sports Collection Site** — independent project
  - Built a merchandise storefront with integrated cart and multi-step checkout workflows.

### LANGUAGES & INTERESTS

- **Languages:** Nepali (Native), English (Fluent)
- **Interests:** Open-Source Contribution, Algorithmic Trading, Technical Blogging, AI & Machine Learning
